Merlion Asset Holdings

MERLION
ASSET HOLDINGS

Ethereum (ETH) Investment Fund

The Fund provides fixed-rate income on capital allocated to an Ethereum (ETH) denominated strategy. Investors commit a single lump-sum subscription over a chosen term of **12 to 60 months**, and interest accrues at **15.00% per annum**, fixed at subscription. Earned interest is made available **monthly** and may be withdrawn in full, in part, or left in place.

The Fund is not suitable for all investors. It is a private, non-exchange-traded product offered by Merlion Asset Holdings Pvt Ltd and is not a registered investment company, collective investment scheme, or bank deposit. Subscriptions are not insured or guaranteed by any government or deposit protection scheme, and investors may lose some or all of their capital.

Fund Details

Fund Code	ETH
Fund Type	Digital Assets
Structure	Private placement
Base Currency	USD
Subscription	Lump sum
Rate of Interest	15.00% p.a.
Investment Horizon	12 - 60 Months
Payout Frequency	Monthly
Return Basis	Fixed, contracted
Risk Classification	Low
Sponsor	Merlion Asset Holdings Pvt Ltd
Domicile	Singapore
Eligibility	KYC-verified
Status	Open

* Fund terms are set out in the plan agreement issued at subscription, which governs in the event of any inconsistency with this document.

Subscription Terms

Contracted Rate	15.00% p.a.
Tenor	12 - 60 Months
Minimum	Per plan tier
Maximum	Per plan tier
Lock-In Period	None
Early Exit	No penalty
Early Exit Penalty	Not applicable

* Subscription limits are displayed at the point of investment. The investor selects a tenor within the 12–60 month range at subscription. The rate is fixed for the full contracted tenor.

Why Invest?

- 15.00% per annum, fixed.** The rate is contracted at subscription and is fixed for your full tenor. Investors receive a stated rate for a stated term rather than a return that depends on market performance.
- Income that arrives monthly.** Interest is credited and made available every month rather than locked until maturity. You may withdraw the full payout, take part of it, or leave it invested.
- No platform or management fee.** This fund carries no platform fee, no ongoing management fee, and no performance fee as at the date of this document.
- The settlement layer for DeFi.** Ethereum underpins decentralised finance, smart contracts, and tokenised assets, making it infrastructure rather than a single application.
- Native staking yield.** Ethereum's proof-of-stake consensus pays validators for securing the network — a source of return that exists independently of the ETH price.

How the Fund Works

STEP 01 · SUBSCRIBE

Invest once

Allocate a single lump sum from your Merlion wallet and choose a tenor between 12 and 60 months.

STEP 02 · ACCRUE

Earn monthly interest

Interest accrues on your invested principal at 15.00% per annum, fixed for your full tenor. Each month the interest earned becomes available to claim.

STEP 03 · DRAW

Withdraw on your terms

Claim the monthly payout in full, in part, or leave it invested. Principal is returned at the end of the contracted term.

Fees & Charges

Platform Fee	None
Ongoing Management Fee	0.00%
Total Charges	0.00%

* No platform fee, ongoing management fee, or performance fee is applied to this fund as at the date of this document.

On past performance. This document publishes no historical track record. For a private, fixed-rate product, a return series is not audited, not independently verifiable by the investor, and not indicative of the rate any individual receives — the contracted rate and the disclosed fees are the material facts.

What determines your return. The contracted rate of 15.00% per annum, the tenor you select between 12 and 60 months, and the fees disclosed here — not the performance of any underlying asset, of the strategy, or of any other investor's subscription.

Risk Profile & Controls

Risk classification	Low
Principal protection	None
Deposit insurance	Not applicable
Capital lock-in	None
Investor onboarding	KYC & AML verified
Sanctions screening	At onboarding
Wallet whitelisting	Required

Risks and Important Information

Issued by Merlion Asset Holdings Pvt Ltd ("Merlion") for information only. This is not an offer to sell or a solicitation to buy any interest in the Fund, and not investment, legal, or tax advice. Read it with the plan agreement, Terms and Conditions, and Risk Disclosure at merlionassetholdings.com, which govern in the event of any inconsistency.

General Investment Risk. Investing in digital assets and alternative investments involves a high degree of risk. Prices can be highly volatile and you could lose some or all of your investment. Consider your situation, objectives, and risk tolerance before investing.

No Guarantees. Merlion does not guarantee the performance of any investment, the return of principal, or any specific rate of return. All illustrations and target figures in this document are estimates based on stated assumptions, and actual outcomes may vary significantly. A contracted rate is a contractual obligation of the sponsor, not a guarantee of payment, and remains subject to the sponsor's ability to meet that obligation.

Counterparty & Credit Risk. Returns depend on third parties — borrowers, issuers, custodians, platform partners — meeting their obligations. Default or insolvency of any of them can cause partial or total loss of invested capital.

Liquidity Risk. The Fund is not exchange-traded and interests cannot be transferred or sold on a secondary market. Capital is committed for the contracted term. Withdrawal terms are set out in the plan agreement and may be suspended in market stress.

Strategy Allocation

Network validation & staking	ETH	48.0%
DeFi liquidity provision	ERC-20	22.0%
Secured lending & collateral	MIXED	15.0%
Treasury & liquidity reserve	USDC	10.0%
Payout buffer	USDC	5.0%
Total		100.0%

* Target allocation ranges as at the date of this document. Actual allocations vary with market and operational conditions and are subject to change without notice. The allocation shown describes how the strategy is deployed; it does not alter the fixed rate contracted with the investor, and it is not a representation of investor-level holdings.

Illustrative Investor Outcomes

SUBSCRIPTION (USD)	PLATFORM FEE	NET INVESTED	MONTHLY INTEREST*	12-MONTH INCOME
1,000	0.00	1,000.00	12.50	150.00
5,000	0.00	5,000.00	62.50	750.00
10,000	0.00	10,000.00	125.00	1,500.00
25,000	0.00	25,000.00	312.50	3,750.00
50,000	0.00	50,000.00	625.00	7,500.00

* Arithmetic illustration calculated at 15.00% per annum on net invested capital, with interest drawn in full each month and no compounding. Monthly interest is the same in every month of the contracted tenor; the twelve-month column is shown for comparability, and an investor on a longer tenor continues to receive the same monthly amount for the full term. **This table is not a forecast, projection, or guarantee of return** — it shows how the stated rate and the stated fees apply to a subscription, and it assumes the Fund meets its obligations in full and on time. Your plan agreement governs. Figures exclude network transfer costs, and any taxes for which the investor is responsible.

Crypto Asset Risk. Digital assets held in connection with the strategy may be subject to loss, damage, theft, or restriction on access. Network congestion, protocol changes, and chain-level failures may delay deployment or payout.

Regulatory & Tax Risk. Changes in law, regulation, or tax policy may affect the value, legality, or tax treatment of an investment and may restrict the platform or the Fund. You are responsible for your own tax position; consult a professional adviser before subscribing.

Technology & System Failure Risk. The platform relies on complex systems that may be vulnerable to cyberattack, software defects, or hardware failure. Disruption could affect account access, transaction execution, or result in loss of data or assets.

Concentration Risk. The strategy is concentrated in a single digital asset and its network. A decline affecting that asset or network will affect the strategy more than a diversified portfolio would be affected.

Eligibility. Subscriptions are accepted only from investors who have completed KYC and AML screening and who are not resident in, or a national of, a sanctioned jurisdiction or one where the offering would be unlawful.
