FLAGSHIP MULTI-ASSET

As of August 12, 2026

Merlion Asset Holdings

Global Digital Index Fund

The Fund provides contracted-rate income on capital allocated to a diversified portfolio spanning digital assets, blockchain infrastructure, and emerging technologies. Investors commit a single lump-sum subscription over a chosen term of **12 to 60 months**, and interest accrues at **22% to 25% per annum**. Earned interest is made available **monthly** and may be withdrawn in full, in part, or left in place.

The Fund is not suitable for all investors. It is a private, non-exchange-traded product offered by Merlion Asset Holdings Pvt Ltd and is not a registered investment company, collective investment scheme, or bank deposit. Subscriptions are not insured or guaranteed by any government or deposit protection scheme, and investors may lose some or all of their capital.

Fund Details

Fund Code	GDIF
Fund Type	Lump Sum
Structure	Private placement
Base Currency	USD
Subscription	Lump sum
Rate of Interest	22% – 25% p.a.
Investment Horizon	12 – 60 Months
Payout Frequency	Monthly
Return Basis	Contracted band
Risk Classification	Medium
Sponsor	Merlion Asset Holdings Pvt Ltd
Domicile	Singapore
Eligibility	KYC-verified
Status	Open

* Fund terms are set out in the plan agreement issued at subscription, which governs in the event of any inconsistency with this document.

Subscription Terms

Contracted Rate	22% – 25% p.a.
Tenor	12 – 60 Months
Minimum	USD 5,000
Maximum	USD 1,000,000
Lock-In Period	12 Months
Early Exit	30.00% penalty
Early Exit Penalty	30.00%

* Subscription of USD 5,000 to USD 1,000,000. The investor selects a tenor within the 12–60 month range at subscription. The rate applicable to your subscription is confirmed in your plan agreement.

Why Invest?

- A contracted band of 22–25% per annum.** The fund targets a return within a contracted band. The rate applicable to your subscription is confirmed in your plan agreement at the point of investment.
- Income that arrives monthly.** Interest is credited and made available every month rather than locked until maturity. You may withdraw the full payout, take part of it, or leave it invested.
- Costs disclosed before you commit.** A single 1% platform fee, with no ongoing management fee and no performance fee. Every charge that applies to this fund is stated in this document.
- Merlion's flagship mandate.** The broadest allocation Merlion offers — diversified across cryptocurrencies, blockchain infrastructure, digital finance platforms, and emerging technologies rather than a single asset.
- Diversification across sectors and regions.** Investing across multiple industries, technologies, and geographies is intended to reduce the impact of any single asset or market on the portfolio.

How the Fund Works

STEP 01 • SUBSCRIBE

Invest once

Allocate a single lump sum from your Merlion wallet and choose a tenor between 12 and 60 months. A 1% platform fee applies at this point.

STEP 02 • ACCRUE

Earn monthly interest

Interest accrues on your invested principal within a contracted band of 22% to 25% per annum. Each month the interest earned becomes available to claim.

STEP 03 • DRAW

Withdraw on your terms

Claim the monthly payout in full, in part, or leave it invested. Principal is returned at the end of the contracted term.

Fees & Charges

Platform Fee	1.00%
Ongoing Management Fee	0.00%
Total Charges	1.00%

* The platform fee is deducted at the point of investment. There is no ongoing management fee and no performance fee.

On past performance. This document publishes no historical track record. For a private, contracted-rate product, a return series is not audited, not independently verifiable by the investor, and not indicative of the rate any individual receives — the contracted rate and the disclosed fees are the material facts.

What determines your return. The contracted rate of 22% to 25% per annum, the tenor you select between 12 and 60 months, and the fees disclosed here — not the performance of any underlying asset, of the strategy, or of any other investor's subscription.

Risk Profile & Controls

Risk classification	Medium
Principal protection	None
Deposit insurance	Not applicable
Capital lock-in	12 Months
Investor onboarding	KYC & AML verified
Sanctions screening	At onboarding
Wallet whitelisting	Required

Risks and Important Information

Issued by Merlion Asset Holdings Pvt Ltd ("Merlion") for information only. This is not an offer to sell or a solicitation to buy any interest in the Fund, and not investment, legal, or tax advice. Read it with the plan agreement, Terms and Conditions, and Risk Disclosure at merlionassetholdings.com, which govern in the event of any inconsistency.

General Investment Risk. Investing in digital assets and alternative investments involves a high degree of risk. Prices can be highly volatile and you could lose some or all of your investment. Consider your situation, objectives, and risk tolerance before investing.

No Guarantees. Merlion does not guarantee the performance of any investment, the return of principal, or any specific rate of return. All illustrations and target figures in this document are estimates based on stated assumptions, and actual outcomes may vary significantly. A contracted rate is a contractual obligation of the sponsor, not a guarantee of payment, and remains subject to the sponsor's ability to meet that obligation.

Counterparty & Credit Risk. Returns depend on third parties — borrowers, issuers, custodians, platform partners — meeting their obligations. Default or insolvency of any of them can cause partial or total loss of invested capital.

Liquidity Risk. The Fund is not exchange-traded and interests cannot be transferred or sold on a secondary market. Capital is committed for the contracted term. Early withdrawal, where permitted, incurs a 30% penalty per the plan agreement and may be suspended in market stress.

Strategy Allocation

Large-cap digital assets	MIXED	35.0%
Blockchain infrastructure	MIXED	25.0%
Digital finance platforms	MIXED	18.0%
Emerging technologies	MIXED	12.0%
Treasury & payout reserve	USDT	10.0%
Total		100.0%

* Target allocation ranges as at the date of this document. Actual allocations vary with market and operational conditions and are subject to change without notice. The allocation shown describes how the strategy is deployed; it does not alter the rate contracted with the investor, and it is not a representation of investor-level holdings.

Illustrative Investor Outcomes

SUBSCRIPTION (USD)	PLATFORM FEE (1%)	NET INVESTED	MONTHLY INTEREST*	12-MONTH INCOME
5,000	50.00	4,950.00	90.75	1,089.00
10,000	100.00	9,900.00	181.50	2,178.00
50,000	500.00	49,500.00	907.50	10,890.00
250,000	2,500.00	247,500.00	4,537.50	54,450.00
1,000,000	10,000.00	990,000.00	18,150.00	217,800.00

* Arithmetic illustration calculated at 22% to 25% per annum on net invested capital, with interest drawn in full each month and no compounding. Monthly interest is the same in every month of the contracted tenor; the twelve-month column is shown for comparability, and an investor on a longer tenor continues to receive the same monthly amount for the full term. The illustration uses the lower bound of the contracted band (22%); the upper bound is not assumed. **This table is not a forecast, projection, or guarantee of return** — it shows how the stated rate and the stated fees apply to a subscription, and it assumes the Fund meets its obligations in full and on time. Your plan agreement governs. Figures exclude any early exit penalty, network transfer costs, and any taxes for which the investor is responsible.

Crypto Asset Risk. Digital assets held in connection with the strategy may be subject to loss, damage, theft, or restriction on access. Network congestion, protocol changes, and chain-level failures may delay deployment or payout.

Regulatory & Tax Risk. Changes in law, regulation, or tax policy may affect the value, legality, or tax treatment of an investment and may restrict the platform or the Fund. You are responsible for your own tax position; consult a professional adviser before subscribing.

Technology & System Failure Risk. The platform relies on complex systems that may be vulnerable to cyberattack, software defects, or hardware failure. Disruption could affect account access, transaction execution, or result in loss of data or assets.

Portfolio Risk. Diversification reduces but does not eliminate risk. A broad decline across digital asset and equity markets will affect the portfolio as a whole, and diversification offers no protection against market-wide losses.

Eligibility. Subscriptions are accepted only from investors who have completed KYC and AML screening and who are not resident in, or a national of, a sanctioned jurisdiction or one where the offering would be unlawful.
